

OEMs

If you are an OEM, you now have a single source electronics distribution solution at your fingertips. Bay Area Computer Products is Silicon Valley's leading independent distributor with over \$20 million of in-house inventory which you can access online through our website to search and/or download. We have board desoldering capabilities at our facility, and therefore offer new, pulled and refurbished products to help you keep costs down. Plus, we have one of the largest electronics product databases, which allows us to quickly procure even hard to find products world wide. "If we can't get it, it probably doesn't exist".

Excess Inventory Liquidation

Bay Area Computer Products can also help you turn excess inventory into regained income, while clearing out much needed warehouse space. We will pay you an equitable rate and even handle the entire moving process for you. It's the fast efficient way to put over-production behind you and make room for that next money-making, hot product.

- We buy excess inventory
- Extensive global sourcing database
- Hard-to-find/obsolete products
- Minimal lead-time
- Competitive pricing
- 20+ years experience
- Knowledgeable, friendly staff
- Over \$20 million in-house inventory
- Online search engine
- Financial resources for large contracts
- Government cage code in place

Bay Area Computer Products has been the sole developer and distributor of the PartBase™ Software, a program designed exclusively for electronics brokers and distributors since 1992. With this program you can now combine all the electronic parts offered to you and organize them in one place. Internet data services, multi-company files, electronic distributor website inventory files, inventory e-mail attachments, floppy disks, etc. can all be imported to one searchable location. Plus, it handles sales invoicing, inventory tracking, sales history and customer contact information. Whether you are a one-person operation or a large corporation, we are confident that this software program will have a place in your company. For more information, visit us at www.partbase.com
